

CMMC Level 3 - Good Cyber Hygiene + Advanced Capabilities

Version: 1.02

Date: July 2025

CMMC Level 3 overview:

CMMC Level 3 is designed for companies that handle the most sensitive CUI and require advanced cybersecurity capabilities. It includes over 130 practices, incorporating all of NIST SP 800-171 and additional practices from NIST SP 800-172, emphasizing proactive and threat-informed defense.

Domains and Selected Practices:

Risk Management (RM)

- RM.3.144: Periodically assess risk to organizational operations.
- RM.3.147: Develop and implement risk response strategies.

Security Assessment (CA)

- CA.3.162: Employ a security assessment plan and execute security control assessments.
- CA.3.163: Monitor security controls continuously.

System and Communications Protection (SC)

- SC.3.177: Employ architectural designs that promote security.
- SC.3.180: Implement cryptographic methods to protect CUI during transmission and storage.
